
**13th Canadian Medical
and
Biological Engineering Conference**

**13^e Congrès canadien
de génie biomédical**

PROCEEDINGS

June 9 - 12 juin, 1987

Halifax, Nova Scotia, Canada

CONFERENCE ORGANIZING COMMITTEE

J. Donald Hatcher
Honorary Chairman

Alexander Nickerson
Allan Marble
Co-Chairmen

Richard Collins
Milan Horacek
Technical Program and Publications

Linda Weaver
Continuing Education Courses

Ken George
Exhibits

Sherwin Nugent
Treasurer

Ken Magee
Secretary

Hermann Wolf
Local Arrangements

Art Chisholm
Publicity

Barbara Hinds
Media Relations

Dorothy Spence
Tours

TABLE OF CONTENTS

Page

SESSION 1A - Biomechanics and Biomaterials I

Metallic Materials for Electronic, Orthopedic, and Soft-Tissue Implants	1
Contoured Anterior Spinal Fixation Plate	3
A Comparison of Pre- And Post-Operative Loadbearing of the Tibia; A Three Dimensional Finite Element Model	7
Comparison of Two Models of the Intervertebral Annulus Fibrosus.	9
External Fixation: A Comparison of the Stability of the Original Hoffmann, Synthes AO and Richards RxFx Frame	11
Experimental Technique for Evaluation of Spinal Instrumentation	13
Ti Alloys Without Ni As Candidates For Applications In Dentistry And Orthopaedics.	15

SESSION 1B - Biomechanics and Biomaterials in Dentistry

Parametric Studies of Force Systems Produced by T-Loop Retraction Springs	17
Sustained Drug Release From Dental Soft Polymer-Gel Systems	19
Development of a Mucous Membrane Irritation Test Using the Hamster Cheek Pouch	21
Dynamic and Static Flow of Prosthodontic Soft Polymers	23
Migration of Plasticizers From Methacrylate Resins	25
Laser Applications In Endodontic Therapy	27
Stress Analysis in Alveolar Bone Surrounding Abutment Teeth for a Fixed Partial Denture with Moire Method, Photoelastic Method and Finite Element Method	29

SESSION 2A - Biomechanics and Biomaterials II

Tibial Cement-Mantle Strains in Total Knee Replacements: Effects of Polyethylene Thickness and Metal-Backing	31
The Biomechanical Effects in Spongy Bone in Application of Plastic Expansion Dowel for Screw Fixation	33

CONTENTS (continued)

Page

Design Features and Early Clinical Results With a Proximally Fixed Flexible Stem Modular Femoral Component in Total Hip Replacement	34
Stress Relief Osteoporosis of the Distal Femur in Total Knee Replacement	35
Predicting Tourniquet-Induced Nerve Damage	37
A Pilot Study to Investigate Screw Behavior in Anterior Spinal Fixation	39
Degradation of Insulation in Polyurethane Cardiac Pacing Leads	41
Stress Distributions in Photoelastic Models of Fracture Fixed With Different Compression Plates	43
SESSION 2B - Hemodynamics	
Haemodynamic Considerations in the Design of Tapered Vascular Prostheses	45
An Incremental Mechanical Analysis of Polyurethane Vascular Grafts Before and After Implantation: A Comparison With Canine Arteries	47
Physiologic Application of a Windkessel Model of Vascular Hydraulic Load	49
Hepatic Microvasculature of the Rat in Experimental Hemorrhagic Shock: An Intravital EPI-Fluorescent TV Microscopy Approach	51
Determination of the Onset of Blood Flow Beneath a Tourniquet Cuff by Impedance Plethysmography.	53
Measuring Blood Flows in Oral Tissues	55
Minimization of the Shearing Stress for Ball Type Prosthetic Valves: A Look on the Ball's Geometry	57
SESSION 3A - Clinical Engineering I	
Applying Management Concepts to Clinical Engineering	59
Workload and Productivity Measures in Clinical Engineering	61
Clinical Engineering and Hospital Mergers	63
A Regional Study of Replacement Equipment Needs.	65

VII.

CONTENTS (continued)	Page
The Development of a Quality Assurance Program in a Biomedical Engineering Department	67
A New Approach to Technical Support For Critical Care.	69
 SESSION 3B - Biomechanics and Biomaterials III	
A New Method to Identify Heel-Strike and Toe-Off Times in Gait Analysis	71
Three-Dimensional Upper Limb Kinematics.	73
Alignment and Geometry of the Normal Knee in Stance.	75
Measuring Vertebral Rotation in Scoliosis.	77
Measuring Biomechanical Effects of Surgery in Human Jaws	79
Temperature Effects on Ligament Properties	81
 SESSION 4A - Clinical Engineering II	
Design of an Infant Compartment for a Neonatal Transport Incubator Compartment	83
Locking Connectors for Anaesthesia and Ventilation Breathing Systems	85
Effectiveness of Breathing Gas Interruption Alarms	87
Preventive Maintenance in Anesthesia Equipment: Results and Analysis.	89
Working with Contaminated Equipment.	91
A Medical Device Hazard Management System.	93
The Development of a Multi-User Clinical Data Base System. . . .	95
 SESSION 4B - Image Processing	
Segmentation of Velocity Fields Obtained by Real-Time Two-Dimensional Echocardiograms	97
Digital Processing of Dynamic Infrared Thermography Image Sequences	99
Edge Ribbons for Edge Detection in Images of Neural Tissue . . .	101

CONTENTS (continued)

Page

Reappraisal of the Compton Scatter Method For Anatomical Imaging.	103
Digital Simulation for NMR-CT Imaging.	105
The Measurement of Scaphocephaly	107
Quantitative Analysis of Ligament Healing Via Directional Filtering	109
Issues to Consider When Acquiring an MRI Facility.	111
 SESSION 5A - Rehabilitation Engineering	
A Method of Evaluation and Comparison of Alternative Multifunctional Myoelectric Control Strategies	113
A Computer Controlled Arm Prosthesis: Philosophy	115
A Computer Controlled Arm Prosthesis: Performance	117
Measurement of Thumb Force Elicited Through Functional Neuromuscular Stimulation	119
Static Stability Testing of Occupied Wheelchairs: Platform Design Considerations	121
A Sliding Disk Control-Interface for an Electric Wheelchair.	123
 SESSION 5B - Modelling, Parameter Estimation and Control in Physiological Systems	
Nonlinear System Identification Methods for Neuromuscular Research	125
A New Method for Identification of Time-Varying Biological Systems	127
On the Linear Range of the VOR and the Role of Nystagmus	129
A Processor for Computer Modelling of Biological Rhythmic Systems	131
A Mathematical Model of the Infant Respiratory System.	133
Cardiovascular Response to High Acceleration	135

CONTENTS (continued)	Page
SESSION 6A - Aids for the Disabled	
A Robot Feeder	137
A Portable Reprogrammable Speech Prosthesis for Non-vocal Disabled Individuals	139
Complex Acoustic Impedance of Normal Human Ears	141
Design of an Acoustic Head Simulator for Objective Assessment of Hearing Protectors	143
Design, Construction, and Testing of a Peripheral Visual Lip-reading Aid	145
Spectra of Telephone Rings and Annunciator Signals Used in an Aid for the Hearing Impaired	147
SESSION 6B - Neuromuscular Research and EEG	
An Automated System for Estimating the Number of Motor Units	149
Methods for the Evaluation of the Increment Motor Unit Counting Technique	151
Comparator Application in Evoked Response Measurement.	153
Adaptive Noise Cancellation of Brainstem Auditory Evoked Potentials Using Systolic Arrays	155
Reference-Free Topographic Mapping of the EEG.	157
Conception D'Une Methode De Detection D'Artefacts Dans L'E.E.G.	159
SESSION 7A - Electromyography I	
An Autoregressive Exogenous Model for the Study of the Diagnostic Yield of Surface EMG Signals	161
Noninvasive Detection of Muscular Conduction Velocity in Single Motor Units	163
EMG Conduction Velocity Estimation At Low Signal To Noise Ratios	165
Real-Time Digital Median Frequency Estimation.	167
Myoelectric Channel Performance.	169

CONTENTS (continued)	Page
Ultrasound Induced Increase in Myocardial Contractility: Metabolic Effects Measured by P31 MR Spectroscopy	171
 SESSION 7B - Electrocardiography and Magnetocardiography	
Effects of Myocardial Anisotropy on the ECG.	173
Body Surface Potentials From a Computer Model of the Atria and His-Purkinje System	175
High-Resolution Magnetocardiographic Studies of the PR - Interval	177
Toward a Magnetic Inverse Solution	179
Diagnostic Information in ECG Body Surface Potential Maps Using a Multipolar Source Model.	181
Application of Fourier and Eigenvector Analysis to the Classification of Integral Maps	183
Exploring Symptom Nonindependence in a Diagnostic Model for the Coronary Artery Disease.	185
 SESSION 8A - Electromyography II	
EMG Modification Mechanisms During Static Loading.	187
Median Frequency of Power Spectra of Surface EMG as a Function of Muscle Contraction Level in Normal Subjects.	189
Power Spectral Analysis of Surface Myoelectric *Signals During Isotonic, Constant Velocity Contractions.	191
Obtaining Surface Recorded Infant Myoelectric Signals.	193
Measurement of the Magnetomyogram From an Excised Frog Muscle	195
Electrofusion and Electropermeabilisation of Cells	197
 SESSION 8B - Biosignal Analysis and Processing	
Automatic Detection of Cardiac Sounds and Murmurs	199
Spectral Analysis of Simulated Cardiac Electrograms	201

CONTENTS (continued)	Page
An Assessment of Signal-To-Noise Ratio of Physiological Signal Using Magnitude Coherency Spectrum	203
Versatile Data Compression and Reconstruction: Two Real-Time Implementations of a Linear Segment Technique	205
Reducing Memory Requirements By Using Variable Length Words.	207
 SESSION 9A - Bioinstrumentation and Biosensors	
A Report on 'SpaceBound 87' The First Canadian Workshop on R&D Opportunities on Board the Space Station	209
Biosensors for Real Time In-Vivo Analysis in Space	211
A Binary Approach To Contact Pressure Distribution Measurement	213
Fast R-Theta To X,Y Coordinate Conversion For Real-Time Sector Scanning	215
The Application of Portable Computers To Clinical Instrument Testing and Patient Data Acquisition	217
Compact Cell Volume Analyser Using A Television Display.	219
Biotelemetric System Based on Magnetic Induction	221
 SESSION 9B - Mapping Techniques in Electrocardiology	
Mapping of Endocardial Electrical Activity During Antiarrhythmic Surgery	223
Methods and Application of Electrocardiographic Body Surface Potential Mapping During Intracoronary Thrombolysis and Angioplasty.	225
A Cardiac Activation Mapping System.	227
An Online Intraoperative Mapping System.	229
Magnetocardiographic and Body Surface Potential Mapping in an Al-Shielded Room.	231
A Refined System to Detect Cardiac Spread of Excitation by Optical Means	233
A New Method To Overcome Motion Induced Distortions In Optically Detected Cardiac Action Potentials	235

CONTENTS (continued)	Page
WORKSHOP - Technology Transfer	
The Role of the User - Manufacturer Interaction in the Development of Successful UK Medical Equipment Innovations	237
INDEX	239
